## MONTHLY UPDATE

The United States, Covid-19 and politics took centre stage in July. Despite the rapid spread of infection in the United States and fresh outbreaks in several European countries previously under lockdown, risk appetite in the stock market was high. Corporate earnings reports in most sectors around the world were less disappointing than expected and led to higher stock prices.

However, substantial exchange rate fluctuations led to wide variations in monthly returns depending on the base currency of the investor. The US dollar fell roughly 5 percent against the euro and 6 percent against the Swedish krona, making July a month of gains for US investors whereas Swedes, for example, recorded negative returns on global equities.

As for the pandemic, the spread of the infection in the United States attracted the greatest interest, and a certain change for the better was noticeable towards the end of July. By contrast, countries like Australia and Japan reported more outbreaks than in the spring. A number of European countries, such as Spain and Belgium, also noted an increase in new cases. All in all, this caused greater concern about new shutdowns and lower expectations for an economic recovery.

### President Trump behind in US pre-election opinion polls

The US presidential election is now less than 100 days away. Pressed by the pandemic, the protests associated with the Black Lives Matter movement and weak economic performance, the opinion polls showed that Democrat Joe Biden was ahead of President Trump.

However, since the ageing Biden is viewed as a weak card, there is great interest in who he will name as his vice-presidential candidate in the election. A woman is likely to be chosen and, among the predictions, senator Kamala Harris from California stands out. Another name option would be Elizabeth Warren, a senator from Massachusetts, who is seen as a possible threat to business in general and to the banking sector in particular. Other candidates of interest are being discussed at great length, but they all lack the breadth and depth of senators Harris and Warren. The choice of running mate, however, is Joe Biden's, and he may surprise us all by going for the candidate who most closely reflects his personal preferences.

### EU rescue package finalised after compromises

In other news, the EU reached an agreement on a major rescue package after several countries, including Sweden, accepted the ratio of grants to loans. US-China relations deteriorated further after China introduced new security laws in Hong Kong. The United States shut down China's consulate in Houston, after which China retaliated by closing the US consulate in Chengdu.

### The world index increased, with a wide spread between sectors

The world index increased by 0.2 percent in euros and 5.1 percent in US dollars. The spread between sectors remained wide, with consumer discretionary and materials at the top while energy companies and banks recorded the biggest declines. The differences were great even in terms of regions, where the United States (despite a weakened dollar) was the best market and Hong Kong and Japan the worst.

### FUND PERFORMANCE

The healthcare sector performed less well than the global market, albeit with a significant spread between its subsectors. Since the start of the year, biotechnology has been the strongest subsector with gains of 6.2 percent in euros (Nasdaq Biotech Index), taking into account the weakening of US currency by 5.4 percent. Medical technology has had a delayed recovery, but was the only subsector that performed positively in July.

The fund fell by 3.7 percent, measured in its main share class IC1 (EUR). Most of the decline can be explained by the weakening of the dollar against the euro. Medical technology made positive contributions to the fund's growth, while biotechnology, pharmaceuticals and services contributed negatively. Biotechnology delivered noticeably negative returns following a strong recovery in the spring and early summer. The fund's best contributors this month were Novocure and Livongo. The worst contributors were Esperion Therapeutics and Vertex Pharmaceuticals.

### Updates on planned clinical trials sent Novocure stock soaring

Novocure is a US medical device company that has developed a novel therapy to treat cancer. The therapy uses electric fields tuned to specific frequencies to disrupt cell division and thus inhibit

Continued on the next page →

tumour growth. The company's technology has been approved for the treatment of glioblastoma (an aggressive form of brain tumour) and mesothelioma (an aggressive form of lung cancer), and Novocure is also conducting other cancer studies. Increased use of the therapy in some of these indications would represent significant sales potential for Novocure.

The company's interim report, which also contained updates on both ongoing and newly planned studies, was well received by the market, causing its share price to rise sharply during the period.

#### Livongo stock continued to rise on preliminary sales figures

Livongo is a US technology company that focuses on the healthcare sector. The company has developed a platform that makes it easier for patients to manage their chronic diseases in the best possible way. It currently has the greatest exposure in the area of diabetes, and other chronic conditions including obesity and high blood pressure. Livongo offers its customers the tools with which to gain better control, through disease monitoring, daily notifications and feedback, and 24/7 access to virtual expert assistance.

The company is a relatively new holding for the fund, and has risen by more than 100 percent since the initial investment. In July, Livongo released preliminary sales figures for the second quarter which showed exceptional performance, partly as a result of Covid-19. Consequently, its share price continued to soar during the month.

#### Protracted economic recovery and profit-taking held back Esperion's share price performance

Following strong performance in June, the US pharmaceutical company Esperion Therapeutics was one of the fund's worst contributors in July. The company's product Nexletol (bempedoic acid) is a tablet that lowers certain blood lipids (LDL). It can be used either as a monotherapy or as a combination therapy with the substance ezetimibe (in which case it is called Nexlizet). Both versions of the product were approved by the US Food and Drug Administration (FDA) earlier this year.

The ongoing Covid-19 pandemic has impeded the launch process. Despite this, prescriptions of the new products enjoyed an upward trend in June. However, the increasing spread of infection in several US states during July caused concern among investors. A protracted economic recovery risks worsening the sales trend for the company's products in the second half of the year. Some profit-taking after its strong share price performance in June also contributed to its negative share price performance in July.

#### Vertex Pharmaceuticals' share price fell slightly despite initial increase in July

Vertex Pharmaceuticals, a US research company that is the market leader in the treatment of cystic fibrosis (CF), was a negative contributor to the fund's performance during the month of July. CF is an extremely rare genetic disorder that affects the body's mucous membranes. Its clearest clinical manifestation is reduced lung function and therefore impaired breathing. Vertex has a portfolio of drugs with which to treat CF, and their various combinations are currently standard treatment for patients worldwide. Thanks to the company's success in developing effective treatments for CF, Vertex has one of the fastest growing sales and profit outlooks in the industry.

After an initial upswing early in July, which represented an increase of nearly 40 percent since the start of the year and just over 50 percent since the low point in March, the share price fell back slightly at the end of the period.

#### OUTLOOK

In July, the fund was affected by profit-taking in biotechnology and a significant weakening of the dollar. Stock market declines often happen partly as corrections to previous strong performances. We are now entering the holiday period with attractive valuations and reasonable expectations. Our own view of the healthcare sector is marked by unmistakable yet restrained optimism. Valuations are low for many companies, including US pharmaceutical companies that are priced at record low levels relative to the S&P 500. At the same time, we are only three months away from the US election that could lead to new conditions for companies in key market segments in the United States, such as changes in Medicare.

#### Acceptable results – after the pandemic and in the run-up to the presidential election

The reporting period, for our part, has been satisfactory. In most cases we have seen solid earnings and prospects for the rest of the year and, in others, less disappointing results than feared. Only in a handful of cases have we experienced sheer disappointment, which have often been sales-related. However, since costs have simultaneously been held in check, the results have been acceptable.

So why isn't the sector performing better? After all, this is an election year in the United States, when returns are typically back-end loaded. The last two months of the year are often strong months in election years – even stronger than they otherwise usually are. This election year should be no exception, and much is at stake in a polarised America. Biden's policies, assuming he is elected president, are relatively unclear. The outcome of the congressional elections is uncertain, although a big loss (losing the possibility to filibuster) for Republicans in the Senate should still be considered unlikely.

#### An election victory for Biden could have positive consequences for the sector

We believe that a victory for Biden would likely have a 'neutral to weak' positive effect on the sector. Under Biden, Obamacare would probably be enhanced and expanded, which would be positive. Similarly, expanded Medicare would be positive. This could mean that anyone aged 60 or older (versus the current 65) would get improved insurance coverage during early retirement or when no longer permanently employed.

While expanded drug insurance under Medicare could result in lower prices, better insurance conditions would mean that more patients would be able to afford prescriptions for new, proprietary – and therefore expensive – drugs. In many ways, this scenario is more appealing than the one four years ago, during the last election, when the entire focus was on drug prices.

#### Covid-19 has had goodwill effects for pharmaceutical companies

Covid-19 has now possibly reached its maximum negative impact on healthcare delivery. The number of new cases of infection appears to be falling in the United States, the number of people being admitted to hospital appears to be declining, in which case the number of deaths should start to decrease relatively soon. The second half of the year should be stronger as access to healthcare gradually normalises. The sentiment for the societal benefits of pharmaceutical companies has improved during the pandemic. Once vaccines are widely introduced, probably in the first half of 2021, this new goodwill will likely be further bolstered and become an asset in what could be a new political landscape.

Crucial for the future, however, is the sector's ability to deliver new products. Research and development have never been so robust. The rate of significant new products introductions is impressive and should support increased sales and earnings alike. A period of harvest awaits the sector.

## ABOUT RHENMAN & PARTNERS

Rhenman & Partners Asset Management, founded in 2008, is a Stockholm-based investment manager focusing on two niche funds administered by FundRock Management Company S.A.: Rhenman Healthcare Equity L/S, founded in 2009, and Rhenman Global Opportunities L/S, founded in 2016. Assets under management amount to approximately EUR 700m. Investment Teams of both Funds are in their investment processes supported by renowned Advisory Boards, including professors and experts with many years of market experience and extensive networks around the world.

## Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID, available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: <http://rhepa.com/the-fund/prospectus/>.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors is strongly recommended to get professional advice as to whether investment in the Fund is appropriate having regard to their particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be

delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the <http://rhepa.com/> website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the <http://rhepa.com/> website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.
