EQUITY L/S

Monthly comment **Hugo Schmidt** Portfolio Manager (Healthcare Services)

SUMMARY

A challenging ending to a volatile year. December was the healthcare sector's worst month of the year. The murder of Brian Thompson, CEO of UnitedHealthcare, shocked the sector to its core. Novo Nordisk released the much-anticipated phase III data for CagriSema which missed market expectations, and the stock fell sharply. At the eleventh hour, the politicians on Capitol Hill managed to agree on a temporary budget and avoided a government shutdown. Healthcare spending naturally came under scrutiny in these discussions. Lastly, the FED's hawkish comments and revised outlook for 2025 had a negative effect on equities, particularly on small to midsize companies.

MONTHLY COMMENT

A negative shift in sentiment for the healthcare sector in general and managed care in particular, followed the killing of Brian Thompson. Many of the reactions to the murder on social media were both cruel and inhumane and filled with false, misleading information. The comments largely revolved around the idea that the profits generated by managed care companies were achieved by denying care, or at least by making it difficult for patients to receive help when they needed it the most. It became blatantly obvious in the online discussions that there was a high level of frustration and anger towards the healthcare system in the US which has become uncertain, complicated, expensive, inefficient and at times unfair. In our view, Brian Thompson was an American success story, a brilliant business executive and a dedicated father of two. In meetings with investors, he was always positive with a can-do-attitude, often with a portion of humour to disarm difficult discussions.

A complex reality in American health insurance

Brian Thompson represented the American health insurance and pharmaceutical benefits industry which sits across the table and negotiates prices with hospitals, pharmaceutical companies and healthcare providers striving to maximize payments for procedures, treatments, examinations and medications. Without tools such as prior authorizations, which aim to minimize unnecessary procedures, healthcare spending would rise dramatically, and patients' premiums would skyrocket. Few people realize that it is frequently their employer, not the insurance companies, that limit access through prior authorizations. It is estimated that waste, fraud, abuse and bureaucracy account for 25 to 30 percent of total healthcare spending. Naturally, cutting this percentage is at the top of the insurance companies' agendas. Malpractice lawsuits which can end in multimillion dollar payouts are another element in

the American healthcare system which contributes to higher spending. Brian Thompson will be remembered as an innovative and warm person. He was a positive agent of change in an industry, which despite its flaws, plays an integral role to finance and distribute healthcare for millions of Americans.

Intense budget negotiations in Congress

In the middle of December, a bi-partisan proposal to avoid a government shutdown was presented in Congress. Elon Musk, the eccentric billionaire and confidant of presidentelect Donald Trump, was against the proposal, arguing that it included too many concessions to the Democrats as well as unnecessary spending items. Musk's criticism on social media made Republicans Congress members tremble and finally pull the proposal. A shutdown did indeed seem imminent at that stage. However, after tough negotiations, a temporary budget which will fund the federal government until March 2025, was agreed. Investors' immediate reaction to the political vitriol was to decrease their exposure to the healthcare sector, as healthcare spending makes up such a large amount of the federal budget.

Hawkish tone from the Fed finished the year

Despite the rate cut of 25 bps in December, the Fed's tone was clearly hawkish. Chairman, Jerome Powell, indicated a more cautious stance going into 2025, with fewer cuts than previous estimates had indicated. As a result, US treasury yields increased, which negatively affected the sentiment for small and midsized companies, particularly those in need of external capital, such as companies within the biotech sector.

Trump's nominations and the healthcare sector

Donald Trump appointed a new chairman for the Securities and Exchange Commission (SEC), the Federal Trade Commission (FTC) and the antitrust department at the Department of Justice

Continued on the next page \rightarrow

(DOJ). Andrew Ferguson will take on the FTC and is expected to be more business-friendly compared to the current head, Lina Khan. There is a strong appetite for mergers and acquisitions in the healthcare sector given the looming patent cliffs and the need for pharmaceutical companies to refill their pipelines.

FUND PERFORMANCE

In December, the fund decreased by 9.8 percent in the main share class IC1 (EUR). All subsectors detracted from performance, with healthcare services and pharmaceuticals performing the worst. Top contributors were Neurocrine Biosciences and UCB. The worst contributors were Novo Nordisk and Procept.

Another commercially approved therapy for Neurocrine Biosciences

During the month, the neurology-focused biotech company announced the FDA approval of Crenessity (crinecerfont), its oral CRF1-receptor agonist for the rare hormonal disease, CAH (congenital adrenal hyperplasia). The label was perceived to support a good initial launch for Crenessity, driving up the stock performance in December.

Strong month for UCB on the back of continued Bimzelx uptake

The strong US launch of anti-IL-17 antibody, Bimzelx (bimekizumab), in psoriasis continued to support the upward trajectory of Belgian biotech UCB's stock. The market also favourably viewed Bimzelx's upcoming launch in the skin disorder hidradenitis suppurativa. The stock performed well during the month despite a pipeline setback for a Parkinson's disease candidate.

CagriSema obesity phase 3 data disappointed for Novo Nordisk

The high expectations for key pipeline obesity drug, CagriSema, in its phase 3 REDEFINE-1 were a 25 percent reduction in weight coupled with good tolerability which would have represented a superior profile to Eli Lilly's Zepbound. The results, which were presented during the month, came in at a 20.4 percent weight loss. Many details remained undisclosed, e.g. the impact of differences in study design versus other trials. The market, however, was underwhelmed as data was perceived to be in a similar ballpark to Zepbound. As a consequence, Novo's stock fell during December.

Negative sentiment affected Procept

Procept is a medical technology company specializing in urology. The company has developed a groundbreaking robotic surgical system utilizing ultrasound and imaging technology. After a strong performance during the first 11 months of the year, the stock declined by 15 percent in December. Despite this setback, the stock was still up by 92 percent for the full year.

REFLECTIONS FROM THE MANAGERS

The organization, the financing, the incentive structure, and the accessibility of the healthcare system in the US are far from optimal. This debate is not new, in fact it is probably decades old. However, in our view, major reform of the system is not likely in the next five to ten years.

Henrik Rhenman Founder/CIO

American healthcare is highly respected internationally, with a high level of production and quality. It offers specialized, advanced, and highly innovative care which is probably among

the best in the world; that is, when it works as it should, and for those who are insured. A single payor system is highly unlikely, and there is widespread public scepticism towards such a system. Any reforms would therefore most probably be introduced gradually. Of course, changes could be introduced faster, but any immediate major reforms ought to be seen as unlikely. They would be viewed as almost sensational. However, the investor community is currently focused on the fact that most experts and many politicians seem to agree that healthcare spending is too high, and that now is the time to save money. It is seen as a given that healthcare money will be tight when cutting the deficit is in focus.

Likely cuts in upcoming budget

The reconciliation budget which will be negotiated and agreed by March, only requires a simple majority in the Senate. The budget will likely include cuts in healthcare spending and changes to the Pharmaceutical Benefit Managers system, which could mean a changing playing field for the healthcare supply chain. This reform, which largely relates to demands for a higher degree of transparency, could be detrimental to the profit margins for the pharmaceutical distribution chain. It is, however, not likely that it would hinder these companies' important role in controlling pharmaceutical utilization to save money and to limit the usage of expensive treatments to intended and best use.

Federal spending to the states to cover Medicaid, the medical care system for those with the lowest incomes, will likely be cut (for example by lowering the increase of such expenditures over time) as well as the letting the subsidies to the ACA Exchanges lapse. We are convinced that any major cuts within healthcare would reduce the prospects, or even make it impossible, for the Republicans to retain their majority of the House of Representatives in the 2026 mid-term elections. The possibility to introduce reform going forward, for example in line with proposals from DOGE, the advisory body run by Elon Musk and Vivek Ramaswamy, is largely dependent on a continued Republican majority of the Congress.

Historically low allocation towards healthcare

The stock market allocation towards healthcare is currently at historically low levels, just over 10 percent. Valuations are lower than the global stock market (P/E 17 compared with world index P/E 19 for 2025), despite the fact that the profit growth for the coming year will be higher, according to consensus estimates. To summarize, the view from the starting blocks for 2025 could look a lot worse. Right now, large cap technology stocks are stealing most of the limelight. We could be in for a broadening of the stock markets' performance in the coming year if and when earnings growth prospects for the Magnificent Seven decline. The healthcare sector should, in our view, have good opportunities to participate in such a scenario following a difficult year despite good fundamentals. The uncertainty regarding the details of the new budget, and the political processes involved, plus the upcoming trade policy, are likely to affect the stock markets just as much as short-term inflation numbers, interest rates and the economic outlook. However, there ought to be room for positive surprises ahead in terms of good earnings reports, M&A activity and promising clinical data for more efficient and better treatments of severe diseases. The healthcare sector will surely continue to grow over a long period of time. We believe there will be some rather interesting opportunities to buy after the pretty sharp correction we have recently seen.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RETURNS.

ABOUT RHENMAN & PARTNERS

Rhenman & Partners Asset Management AB ("Rhepa") was founded in 2008 and is a Stockholm-based asset manager with a focus on the healthcare sector. Rhepa is responsible for the portfolio of a sector fund registered in Luxembourg: Rhenman Healthcare Equity L/S. The fund is managed by FundRock Management Company S.A. who has commissioned Rhepa to manage the fund's portfolio. Rhepa's experienced investment team is supported by a scientific advisory board consisting of medical experts with a global network of researchers and specialists.

Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID. available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: http://rhepa.com/the-fund/prospectus/.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors are strongly recommended to get professional advice as to whether investment in the Fund is appropriate having considered particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not

guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the http://rhepa.com/ website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the http://rhepa.com/website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.

The representative in Switzerland is FundRock Switzerland SA, Route de Cité-Ouest 2, 1196 Gland, Switzerland. The paying agent in Switzerland is Banque Cantonale de Genève (BCGE), 17 quai de l'Ile, 1204 Geneva, Switzerland. The Prospectus, the Articles of Association and Iannual and semi-annual report, if anyl Iannual financial statements] can be obtained free of charge from the representative in Switzerland. With regards to the Shares offered in Switzerland, the place of performance is the registered office of the representative and the place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.
