

Summary

- ♦ Like last month, May was overshadowed by worries over tariffs and trade barriers. The simultaneous debates surrounding the budget, drug prices as well as tariffs resulted in too much uncertainty for many healthcare investors, despite the low valuations. As a result, the healthcare sector underperformed the world index by 9 percent (in US dollar).
- The fund experienced a weak month, also in relation to the sector overall. Mediumsized companies held up somewhat better than small and large caps. The biotech subsector, consisting of many small research-intense companies, continued to struggle.
- The Trump administration threatens to implement measures aimed at bringing down drug prices in the US. Furthermore, sector-specific tariffs could, if proposed and implemented, cause further issues.

Monthly comment

During May, worries about tariffs continued. However, it became clear that cuts in demands for permanent tariffs were both desired and seemingly what the Trump administration was aiming for. Trump announced a 90day break on the Chinese tariffs of 145 percent, and the 50 percent tariffs on goods from EU was halted until July 9th Negotiations with several counterparts were initiated during the month but it was not clear which one would come into place first. It seemed likely that deals with certain mediumsized countries would be implemented before agreements with China and the EU. An agreement between the US and the UK did, however, come into place rather quickly.

In these negotiations the US was primarily trying to achieve two things: to remove as many formal and informal trade barriers as possible, and to generate revenue from the tariffs to finance a major part of the tax reform which is currently going through Congress. The main US case for the one-sided tariffs is twofold: firstly, the US exports are subject to valueadded tax, while Europe receives tax revenues which the US has no benefit of. This skews the competition between the US and Europe. Secondly, China's very low levels of public spending on social safety nets to support their population, could be seen as a form of unfair competition (dumping). This, according to the argument, could cause US social structures to crumble in the long term.

Questions around tariffs and the budget closely linked

One estimate, with assumptions regarding future growth and interest rates, is that 200 billion dollars per year (or 2 trillion in 10 years) in tariff revenues are needed to finance the tax reform while also decreasing the budget deficit.

Whether or not Congress can, or may, take these tariffs into account in terms of the budget process in the Senate remains to be seen. The majority's preference to treat the tax reform as "current policy" (does not require financing) rather than "current law" (does require financing when extended) means that the tariffs will probably not be allowed to be included for the reconciliation budget. Hence, continued budget negotiations

seem to feature two parallel routes (officially without tariff revenues but also without demands for financing previous tax reform in 2017 and "unofficially" including these revenues). This, however, could certainly lead to some confusion for the general public, the press and perhaps for some politicians. The official responsible for maintaining the Chamber's rules for budget reconciliation, the parliamentarian, would have to accept the basis of this duality.

The House passed the budget

Following several attempts, the House of Representatives passed the new budget. For the healthcare sector, the new budget included both a tax reform and cuts in Medicaid. However, the cuts were smaller than feared, and hence the market gave a sigh of relief. The reform means that a large group of people will lose their insurance but, for many conservatives, the reform also has a "higher" political purpose: Medicaid, they say, is intended for particularly vulnerable groups and should not be part of a lifestyle where individuals pull back from society's overarching system whereby all adults contribute to their livelihood to the best of their ability.

Fund performance

As fears of a "worst-case scenario" for tariffs faded, stock markets in general increased. The MSCI World Index up 5.5 percent as measured in US dollars. The healthcare sector (MSCI World Health Care Index), however, was down 3.6 percent as measured in US dollar due to continued uncertainty around pharma tariffs, budget negotiations and concerns around Most Favored Nation policy. The fund had a negative month and on the last day of the month, the fund experienced a setback in two companies Sanofi and Regeneron, both sponsors of a clinical project for chronic obstructive pulmonary disease (COPD).

The fund had a negative month and was down by 5.2 percent in the main share class IC1 (EUR). Net exposure was increased slightly following the closure of a couple of short positions. Large and small caps detracted the most while medium-sized companies held up better. All sub-

sectors apart from medtech contributed negatively. The best contributions were Insulet and Tenet while the worst contributions were Eli Lilly and UnitedHealth Group.

Strong month for Insulet

Insulet is a US-based medical technology company and a global leader in tubeless insulin pumps for diabetes management. In May, the company presented its first-quarter results, which exceeded market expectations. Revenue grew strongly, driven by continued high demand in the US, while growth also accelerated in Europe, particularly in Germany and the UK. At the same time, the company raised its full-year guidance by a few percentage points. The stock rose nearly 30 percent during the month and was one of the fund's top contributors in May.

Tenet Healthcare firing on all cylinders

Tenet is a US healthcare provider focused on hospitals and ambulatory surgery centers. Just before the turn of the month from April to May, the company released its quarterly report which exceeded market expectations with stable volumes and solid cost control. The company has undergone a significant portfolio change in recent years and now puts greater focus on ambulatory surgery centers. This has positioned the portfolio for higher growth, decreased the leverage ratio, and improved the margin profile. Moreover, policy risks receded during the month after the House of Representatives passed budget reconciliation legislation. The bill did not contain any of the more draconian measures such as site-neutral payments, substantial cuts to FMAP or State Directed Payment programs. This brought relief to hospital stocks.

Several factors dragged down Eli Lilly's share price

After a strong performance in April, Eli Lilly's share price fell sharply in May. The downturn was caused by several factors, where the earnings report disappointed as management downgraded earnings guidance for the year, and concerns over a potential price war between the two main obesity companies increased. Discussions concerning the 'Most Favored Nation' in the US have impacted the whole sector and the pricing of obesity drugs has been pinpointed as being particularly unfair by the Trump administration. Eli Lilly's share price fell by almost 20 percent before turning slightly more positive towards the end of the month.

UnitedHealth fell on retracted guidance

UnitedHealth Group is a vertically-integrated managed care company. The company operates care clinics and provides healthcare technology, in addition to being the world's largest health insurance company. During the month, the company suspended financial guidance and announced a leadership transition. As care activity continued to accelerate and broaden to more types of benefit offerings, the company felt it necessary to suspend guidance. The executive chairman, Stephen Hemsley, replaced Andrew Witty as CEO. Hemsley previously served as CEO for UnitedHealth Group between 2006-2017.

Reflections

The general sentiment for the healthcare sector is weak, especially for American companies. Reactions to negative news have been sharp while reactions to positive news have been only modest. Risk/rewards have been poor. It is not difficult to foresee further negative developments for the sector. General tariffs as well as potential sector specific tariffs, in accordance with section 232 in the 1962 Trade Expansion Act (imagine steel tariffs but on pharmaceuticals) are troublesome. In the short term we could see some rather strong reactions, specifically on companies with production outside of the US. We focus on companies with low or modest

exposure and, here too, it is challenging to get a clear picture as information about production, transfer pricing and profit generation streams is limited. Many affected companies are planning, where reasonable and possible, to relocate their production to the US to produce what is being sold in the US. Hence, one company after another is announcing new or further investments in the US. To the best of our ability, we aim to make risk trade-offs with the objective of mitigating the impact of high sector-specific tariffs on the fund's volatility.

'MFN' discussions enter the political scene... once again

The policy principle 'MFN' ('Most Favored Nation'), in other words the Trump administration's preliminary proposal where American drug prices should reflect the lowest prices in the Western world, is complex. It is sensational from the media's point of view, but ultimately it is, in our view, not likely to have any major impact.

Our assessment is that the US government cannot implement such a pricing strategy, at least not to a vast degree, without new legislation (meaning 60 votes in the Senate). Medicare could potentially be used as a demonstration project, for instance within a specific therapeutic area, or as a basis for the IRA negotiations which now occur once a year for products which do not face competition from (bio) generics. It is difficult to predict potential market reactions following a tough 'MFN' proposal from the Senate within the reconciliation budget. It would mean a lot of noise and headlines, but most probably without much impact on prices, seen as an industry average. There is of course a risk, at least a hypothetical risk, of new bipartisan legislation. However, it would be an extraordinary event and moreover it would mean abandoning the ambition to get other Western countries to increase their drug prices. It would also mean dramatic cuts in the pharmaceutical industry's R&D budget. A growth industry, with highly qualified jobs, would suffer from a serious strategic setback which we do not believe is what the administration or Congress is after.

Politics is not just wanting, but doing

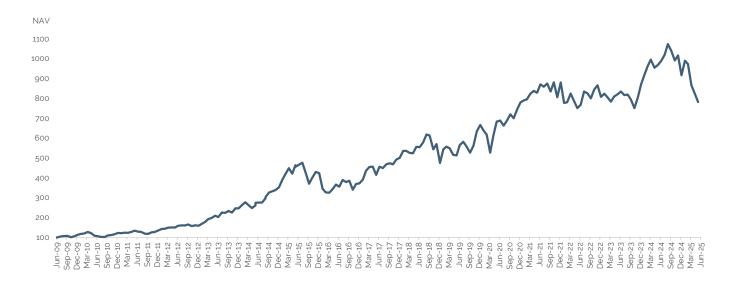

The new healthcare politics are taking shape, and although there is currently a lot of turbulence, it is not certain that the actual changes will be either major or rapid. The area of vaccination is an interesting example, where biotech company Novavax recently got a completely new Covid vaccine approved, despite US health secretary Robert F Kennedy Jr's vaccine skepticism. New Covid vaccine recommendations were launched towards the end of May. These were not as strict as first feared. For instance, vaccine is still recommended for children - in consultation between doctors and parents/ guardians. Thereby, the administration seems to have stopped state-level enforcement and recommendations of Covid vaccinations for children to be able to participate in school education. Both of these events mean that the healthcare industry is finding ways to adjust to the new environment without coming to a complete halt and starting over from scratch.

Valuations present interesting opportunities

We now have a situation where several well-known companies which we deem to be growth companies are trading at P/E 12, plus/minus a couple of multiples. The sector overall is trading at P/E 16. These levels are closing in on the levels seen after the global financial crisis in 2008-2010. We view this as an interesting opportunity to increase our exposure in some of these companies. However, if the trade agreements do not come into place during the summer, we cannot dismiss the risk of a mild recession, and we may even have to view it as probable. The healthcare sector has historically coped relatively well in such markets. In the current environment where there is a high degree of uncertainty significant risks still remain, but opportunities ought to outweigh them, in particular in the medium term.

Legal disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID. available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: http://rhepa.com/the-fund/prospectus/.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors are strongly recommended to get professional advice as to whether investment in the Fund is appropriate having considered particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore,

information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the http://rhepa.com/ website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the http://rhepa.com/website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.

The representative in Switzerland is FundRock Switzerland SA, Route de Cité-Ouest 2, 1196 Gland, Switzerland. The paying agent in Switzerland is Banque Cantonale de Genève (BCGE), 17 quai de l'Ile, 1204 Geneva, Switzerland.
