MONTHLY UPDATE

If people felt battered by the dismal news feeds and stock market declines in February, events in March were even worse. After the spread of Covid-19 infection in countries like China and South Korea had tapered off, it was Europe's turn. There, countries like Italy and Spain noted exponentially rising numbers of infections and deaths. The United States then became the next target of the bad news.

Quarantine or the "Swedish model"?

The public policy response consisted of strong stimulus measures of up to 5-10 percent of GDP in some countries, and de facto lockdowns of entire nations. For example, Italy, France, Spain, the UK and India effectively imposed curfews. It is believed that 25 percent of the world's population is currently under quarantine. In this context it can also be noted that the "Swedish model", which still allows relatively unlimited freedom of movement, is the subject of a wide-ranging debate in the rest of the world.

Historical slowdown in economic activity

As a result of all this, we are now experiencing the sharpest slowdown in economic activity on record. What began as a supply shock – the disruption of supply chains as a result of closed borders in China and other countries – has now been compounded by a demand shock. In addition to the restaurant, hotel and travel industries, who are the obvious losers, more and more industrial companies are now suspending their operations due to the lack of both parts and materials and the lack of demand.

Investors were completely caught off guard by this "black swan". As recently as early February, exposures to risk assets such as equities were the highest in several years. The sharp declines, first in February and then in March, reflect a general loss of risk appetite in asset classes such as equities, corporate bonds and commodities.

World index fell – but the variation was great

The world index decreased by 13.8 percent in March, measured in euros. Although all sectors experienced significant declines, there was

a considerable spread between best and worst sectors. Healthcare companies and consumer staples fared relatively less poorly, while energy companies and banks showed the biggest declines. Geographically, the spread was also significant. Hong Kong and NASDAQ managed relatively well, while Europe and the UK showed the biggest declines.

FUND PERFORMANCE

The fund decreased by 14.8 percent measured in its main share class IC1 (EUR), and by 12.9 percent measured in RC1 (SEK). All subsectors contributed negatively to fund performance, with biotechnology as the sub-sector providing the largest negative contribution, followed by medical technology. Pharmaceutical companies were the relative top-performing subsector, which can be explained by their stable earnings capacity even during periods of poorer economic growth and by the continuing use of most medicines despite what is happening in emergency care. The fund's best contributors this month were Faron Pharmaceuticals and Vertex Pharmaceuticals. The worst contributors were Esperion Therapeutics and Amarin.

Faron Pharmaceuticals' share price up after Covid-19

The Finnish research company Faron Pharmaceuticals was one of the best contributors to the fund in March. Their lead drug product, Traumakine, aims to prevent vascular leakage. This is a condition that can lead to organ failure and is therefore associated with high mortality. No clinical efficacy was detected in studies of acute respiratory distress syndrome. However, follow-up revealed that the reason was the effect of cortisone given in combination with Traumakine, which had a negative impact on the course of the disease. This has given new hope for the clinical development of Traumakine.

The reason behind the company's strong stock performance in March was the hypothesis that Traumakine might also alleviate the inflammatory process seen in the lungs of patients with Covid-19, which can lead to permanent damage to lung tissue. The company is now taking part in a comprehensive global study for the treatment of severe

[Continued on the next page →](#)

pneumonia, which also includes Covid-19 patients.

Combination therapies for cystic fibrosis saved Vertex Pharmaceuticals

Another positive contributor was Vertex Pharmaceuticals, a US research company that is the market leader in the treatment of cystic fibrosis (CF). CF is a very rare genetic disorder that affects the body's mucous membranes. Its clearest clinical manifestation is reduced lung function and therefore impaired breathing. Vertex has a portfolio of drugs to treat CF, and their various combinations are currently standard treatment for patients worldwide.

Like several of the major US research companies, Vertex's share price withstood the general decline in March and the company has stable, growing earnings from the sale of drugs to chronically ill patients.

Launch problems dragged down Esperion Therapeutics' share price

The US pharmaceutical company Esperion Therapeutics was one of the fund's worst contributors in March. The company's product Nexletol (bempedoic acid), is a tablet that lowers specific blood lipids (LDL). It can be used either as a monotherapy or as a combination therapy with ezetimibe (in which case it is called Nexlizet). Both versions of the product were approved by the US Food and Drug Administration (FDA) earlier this year. Nexletol was launched at the end of March.

The ongoing Covid-19 pandemic, however, have resulted in fewer patient visits, making the launch process more difficult. Instead of postponing the launch, the company therefore introduced an alternative launch strategy in which sales reps instead have virtual meetings with doctor's offices as well as online training. This has led to increased uncertainty in sales forecasts, which had a negative effect on share price performance during the period.

Amarin lost patent case – share price took a nosedive

Amarin was one of the fund's worst contributors in March. Amarin is a US research company that develops and markets the drug Vascepa. In long-term follow-up clinical trials, Vascepa has demonstrated very strong risk reduction data for cardiovascular mortality by lowering triglycerides in the blood. Vascepa is based on a unique formulation of Omega-3 acid. A number of other companies have developed generic formulations of Vascepa, and Amarin has sued them for patent infringement.

Although several patent experts assessed the patent protection for Vascepa to be strong, the Nevada District Court ruled in favour of the generic companies, causing the share price to plummet on the last trading day of the month. Amarin intends to appeal the decision, and the legal process will then advance to a court with greater expertise in intellectual property.

OUTLOOK

The devastating effects of the corona pandemic on the global economy in the short term are, on the whole, well known. The big question is, what will happen going forward? Will the global economy be able to recover with as much force as it has thus far in China or will the recession continue. And will the wheels only start spinning again after vaccines and medicines are available to protect and treat the population? Will the global economy suffer permanent damage as a result of the bankruptcies, lost income and unemployment, making a rapid recovery more difficult if not impossible? It is not possible to know. Our primary scenario is that the public health measures in force, mainly social distancing, together with summer warmth and humidity, will offer a much calmer course of events, and that the burden on hospitals in the northern hemisphere will peak during May.

The pandemic should, of course, neither be underestimated nor overestimated. Our current state of knowledge is not enough to dismiss the great inherent uncertainty. However, it might be appropriate to put the pandemic in a historical context. Both in 1957 and in 1969, severe influenza pandemics claimed the lives of more than one million people among a world population less than half that. Many analysts believe that the current corona pandemic will claim far fewer victims. It is, however, extremely difficult to assess developments in countries like India and Africa, which may, of course, be hit very hard.

The pharmaceutical industry can become vital for managing the pandemic

Starting in May, it is likely that we will begin to see preliminary results of the first drug trials and that there will be at least one drug, or more likely several, that will be able to reduce Covid-19 mortality. Even if vaccine trial results will not be available in the near future, we believe that there are opportunities for vaccines to be introduced in the coming 9–18 months. However, many experts are clearly sceptical to this timeline, arguing that neither the efficacy nor the safety of such a vaccine can be adequately documented in such a short period. The counter-argument is that a vaccine will probably be introduced in stages, where high-risk groups are vaccinated first. They may thus themselves become participants in the clinical trials.

During a protracted normalisation process, our sector appears very attractive

We think it reasonable to believe that the world will begin a process of normalisation this summer starting in June. In July and August, the wheels should start spinning faster and faster. We will, however, expect to see great concern among the population as we approach the autumn, and many of the social measures now in force might need to remain or be reinstated. Extensive testing of the global population will be necessary to increase the chances of quickly identifying a new wave of infection. The introduction of so-called serological tests, which help to discover whether a person has had Covid-19 and is thus immune, will simplify the decision to allow people to return to their jobs. In combination with virological tests, which identify suspected early or symptom-free courses of infection, the healthcare system will be better equipped to deal with a second wave of the pandemic.

It is difficult not to expect a prolonged recovery process for the global economy. During that period, the healthcare sector is likely to be a highly attractive sector for many to invest in. However, the subsectors have completely different conditions, and we must expect companies in medical technology, for example, to face tougher times before healthcare in a broad sense functions normally again. Clinical trials will probably be significantly delayed, which often affects small research companies. The fund will therefore have to make some difficult trade-offs. On the one hand, there are large companies which are more or less operationally intact in the short term and whose prices have not been significantly impacted either. On the other hand, substantial "corona discounts" have presented themselves in smaller companies. Although they face a very difficult year ahead, their potential for development remains. Nevertheless, the healthcare sector as a whole remains very attractive in terms of both fundamentals and low valuations.

ABOUT RHENMAN & PARTNERS

Rhenman & Partners Asset Management, founded in 2008, is a Stockholm-based investment manager focusing on two niche funds administered by FundRock Management Company S.A.: Rhenman Healthcare Equity L/S, founded in 2009, and Rhenman Global Opportunities L/S, founded in 2016. Assets under management amount to approximately EUR 600m. Investment Teams of both Funds are in their investment processes supported by renowned Advisory Boards, including professors and experts with many years of market experience and extensive networks around the world.

Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID, available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: <http://rhepa.com/the-fund/prospectus/>.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors is strongly recommended to get professional advice as to whether investment in the Fund is appropriate having regard to their particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be

delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the <http://rhepa.com/> website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the <http://rhepa.com/> website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.
