MONTHLY UPDATE

US politics, Covid-19 and technology stocks took centre stage in August. The month was characterised by strong risk appetite, not least among private investors. Global stock market trading was dominated by the United States, where both the NASDAQ index and the broader S&P 500 index posted new record highs.

Interest in the major US technology companies was particularly notable. Retail investors accounted for a high share of total turnover in the stock market. For example, Apple and Tesla recorded gains in August of more than 30 percent and 60 percent, respectively, in the absence of any news other than an announcement from both companies of a stock split.

During his speech in Jackson Hole, chairman of the US Federal Reserve Jerome Powell said that the inflation target would be adjusted, which was interpreted as meaning that interest rates would remain low for a long time to come.

As for Covid-19, the situation in the United States continued to gradually improve in August. However, several countries in Europe noted an accelerating infection rate after shutdown orders were lifted at the beginning of the summer. France and Spain were clear examples, and despite government ambitions to keep economies open, there is now growing concern over new shutdowns. In other parts of the world, such as Brazil and India, there are still no signs of the pandemic subsiding.

Trump gaining on Biden

Interest in politics was almost exclusively focused on the impending US presidential election. The relatively large lead that the polls gave Democrat Joe Biden earlier in the summer shrank in August, and his advantage over President Trump was down to only a few percentage points. As expected, the debate is polarised and much revolves around the unrest in several US cities. The two candidates are accusing each other of advocating a policy that risks tearing the American society apart.

Harsh tone between the US and China

The tone of the US-China conflict intensified further in August when President Trump ordered a US ban on the popular TikTok app,

owned by the Chinese company ByteDance, unless the ownership situation was changed. After several US companies were identified as potential acquirers, China responded by announcing sales restrictions on foreign buyers.

Most global sectors increased in August

During August, the world index increased by 4.6 percent and 6.0 percent measured in euros and US dollars, respectively. With the exception of utilities and energy, all global sectors recorded gains. However, information technology and consumer discretionary showed by far the largest upswings. All regions showed positive index figures but there were major differences, with the US in the lead while Europe and Hong Kong lagged far behind.

FUND PERFORMANCE

Similar to July, in August the healthcare sector performed weaker than the global market. Although biotechnology remained weak in August, it has been the top-performing subsector since the beginning of the year, with an increase of about 6 percent in euros (Nasdaq Biotech Index), despite a weakening of the US currency of more than 6 percent. Medical technology has experienced a delayed recovery, but has performed more strongly over the past two months than other subsectors.

The fund increased by 4.0 percent, measured in its main share class IC1 (EUR). All subsectors made positive contributions to fund performance. Three of the fund's companies were acquired during the period.

The best contributors to the fund this month were Horizon Therapeutics and Aimmune Therapeutics. The worst contributors were BioMarin Pharmaceutical and Adverum Biotechnologies.

Raised sales outlook for Horizon Therapeutics' Tepezza sent share price up

Horizon Therapeutics is a US pharmaceutical company specialising in rare diseases. The company's product Tepezza, launched earlier this year, showed continued strong growth in the second quarter and once again beat market expectations. Tepezza is an

[Continued on the next page →](#)

IGF-1R inhibitor for the treatment of thyroid eye disease caused by excessive levels of thyroid hormones. With the exception of surgery, alternative therapies have been lacking in the past. The launch of Tepezza has been very well received by treating physicians, who see broad potential for the product at different stages of the disease.

In its second-quarter interim report, the company raised its sales outlook for the product, and now sees a market potential worth 3 billion dollars compared with the previous 1 billion dollars. This sent the share price soaring.

Aimmune Therapeutics stock rose after main shareholder's bid for outstanding shares

Aimmune is a US biotechnology company that develops new treatments for food allergies. The company's product Palforzia is approved for the treatment of peanut allergies. Its main shareholder, Nestlé, made a bid for the outstanding shares representing a premium of 174 percent. Aimmune thus became one of the major contributors to the fund's performance in August.

Delayed launch lowered BioMarin Pharmaceutical's share price

BioMarin Pharmaceutical is a US biotechnology company focusing on rare diseases. A pioneer in gene therapy, the company has also developed Roctavian, a gene therapy for the treatment of haemophilia A. The goal is for patients to produce factor VIII themselves following treatment with Roctavian after adding the gene responsible for the expression of factor VIII protein, which is an important part of the coagulation cascade that haemophilia patients lack.

The company suffered a major setback, however, in August, when the FDA asked them for longer-term follow-up data instead of approving Roctavian. The launch is thus likely to be delayed by two years, until the end of 2022. The share price reaction was sharply negative, and the fund's holding in BioMarin thus became the worst contributor during August.

Adverum Biotechnologies' share issue negatively impacted share price

Adverum Biotechnologies is a US biotechnology company focusing on gene therapies. The company has shown promising data for its drug candidate ADVM-022, which is being developed for the treatment of wet age-related macular degeneration, the most common cause of severe visual impairment and blindness in the Western world. The condition is currently treated with so-called VEGF inhibitors, which prevent the growth of new blood vessels in the eye. The treatment is effective but requires frequent injections.

ADVM-022 is a gene therapy that allows a single injection of aflibercept (Eylea), a currently approved VEGF inhibitor. However, the company offered new shares in August, which negatively impacted its share price.

OUTLOOK

We are now two-thirds of the way through 2020 – a volatile and eventful year that will go down in history as an important year. It is a year that will affect us for a long time to come. After a sharp decline in the spring, the fund has made a complete comeback and is on the plus side for the year in all currencies. However, the depreciation of the USD has stifled the fund's performance in euros and kronor.

The Covid situation is settling down

On the Covid front, things are steadily settling down. Vaccines are likely to be introduced before year end. Mortality rates are falling sharply, not only thanks to better care but also because young people are becoming infected more than the elderly, at least they were during the summer. Many people have learned to live with the risk of infection. Communities are gradually opening up, and are being shut down sporadically and locally as needed.

Different presidential candidates, but not such big differences for us and our fund

The US election will be contested by the sitting president who intends to continue on the same track as the last four years and a presidential candidate who will surely return to the kind of reforms launched by the Obama administration. This means that, regardless of who is elected president, the outcome will have surprisingly little effect on companies in the healthcare sector, according to our projections. Both candidates say they want to expand healthcare for those with the worst insurance coverage. For Republicans, this probably means continued expansion of Medicaid funding, even though different party officials often oppose this idea. For Biden, it probably means continued expansion of Obamacare.

Reforms to Medicare Part D, which involves prescription drug coverage, will be a high priority regardless of which of the two candidates wins the election. Both want to lower the cost for patients when picking up their prescriptions, and the pharmaceutical industry will be involved one way or another in paying for a substantial portion of such a reform. But, in all likelihood, this will still be a positive-sum game for the industry, which can expect slightly lower margins but higher sales. "The devil is in the details" is an expression that is highly applicable here. In the process of reforming the health insurance system and drug insurance within Medicare, there will obviously be winners and losers. We are well prepared for this, although it could obviously have negative effects on the fund.

An exciting autumn awaits us, with a strong market

We are approaching an autumn with a US election and all that it entails – high volatility, political ploys and sector rotations. A close race is underway, and tensions are set to skyrocket ahead of election day. Concerns about a possible need to recount the election results are already being discussed intensively. However, the market as a whole remains strong, the sector is in good shape and our companies' valuations are attractive. In fact, the companies are priced for low growth, which is hardly in tune with the demographics or the medical needs and opportunities.

Above all, the political attitude towards the sector is different now than it was four years ago. At that time, pharmaceutical companies were viewed as a major part of the problem. Today they are considered part of the solution. A harvest period appears to lie ahead, with new products, new indications and new markets. We are about to enter an exciting, promising period.

ABOUT RHENMAN & PARTNERS

Rhenman & Partners Asset Management, founded in 2008, is a Stockholm-based investment manager focusing on two niche funds administered by FundRock Management Company S.A.: Rhenman Healthcare Equity L/S, founded in 2009, and Rhenman Global Opportunities L/S, founded in 2016. Assets under management amount to approximately EUR 800m. Investment Teams of both Funds are in their investment processes supported by renowned Advisory Boards, including professors and experts with many years of market experience and extensive networks around the world.

Legal Disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID, available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: <http://rhepa.com/the-fund/prospectus/>.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors is strongly recommended to get professional advice as to whether investment in the Fund is appropriate having regard to their particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be

delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the <http://rhepa.com/> website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the <http://rhepa.com/> website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.
