

Monthly report

RHENMAN HEALTHCARE EQUITY L/S

For professional investors only. Past performance is no guarantee of future returns.

Henrik Rhenman
CIO

Summary

- ◆ The war in the Middle East dominated the month of March, both in terms of the news flows and the movements on the equity markets. Interest rates rose during the month, reflecting a market that increasingly questioned the likelihood of near-term rate cuts.
- ◆ The fund recorded a negative month. However, performance was supported by two acquisitions within the biotechnology sub-sector, which also proved to be the strongest-performing sub-sector during the month.
- ◆ Diversification, quality, stable growth, and companies with products that address important medical needs remain key guiding principles as we look ahead.

Monthly comment

The war in the Middle East dominated the month in terms of news flows as well as equity market movements. The S&P 500 was close to entering correction territory, meaning a level 10 percent below its peak reached at the end of 2025. The VIX index, which measures market expectations for future volatility, rose above 30, a level that is often, somewhat arbitrarily, interpreted as signalling an "oversold" market. The healthcare sector was unable to withstand the broader market pressure and declined by 6.4 percent measured in EUR. The global equity index, MSCI World, fared somewhat better, declining by 4.3 percent.

Iran's resilience underestimated

As the month progressed, it became increasingly apparent that the US had underestimated Iran's aggressiveness toward its neighboring countries, as well as its ability to quickly and easily block the Strait of Hormuz. Iran managed to block the strait without resorting to much more than threats of mines and limited attacks on individual vessels anchored in the Gulf. Over time, it also became clear that Iran's missiles and drones were significantly more precise than previously assumed, both in terms of target selection and their ability to actually hit those targets. This was likely facilitated by support from China and/or Russia, including equipment, information and intelligence sharing. It further indicated that the conflict was not asymmetric with a clearly dominant US on one side and a much weaker Iran on the other.

Furthermore, even relatively small, limited tactical counterattacks created significant operational challenges for the US which, if repeated, could, over time, affect the military superiority and endurance of the US. The deployment of US defensive missiles reached record levels during the month, and Iran's attacks on US bases in the Gulf region were a source of real concern. The loss of a costly, strategically important communications and reconnaissance aircraft was not only symbolically significant, but also constituted a tangible tactical setback for the US.

On the political front, March was characterized by a series of threatening statements from both sides, many of which contradicted their earlier positions. On the final day of the month, it appeared that President Trump could consider exiting the conflict without the reopening of the strait, while Iran's president indicated a willingness to enter talks and negotiations, provided the US offered assurances that the conflict would not reignite. The response from the Gulf states was not made public, but their stance will probably be important for any such process to succeed. The central issue remained the Strait of Hormuz and, more specifically, whether Iran should be able to impose tolls on traffic passing through the strait. History, after all, is full of tolls.

Macro and market uncertainty pushed interest rates higher

During March, interest rates rose sharply although they fell back somewhat on the final day of the month. The US two-year Treasury yield rose by almost 60 basis points at its peak, reflecting the market's declining confidence in future rate cuts. These rate increases, driven both by inflation expectations and by rising risk premia across asset classes, helped explain why forward-looking growth companies such as pharmaceutical stocks declined, despite the fact that recession risk would normally be expected to favor such companies relative to others. An additional factor was likely profit-taking, as large pharmaceutical companies performed well earlier in the year.

Fund performance

The fund declined by 7.9 percent in March in the main share class IC1 (EUR). Biotechnology was the strongest-performing sub-sector, likely reflecting the fact that the sector had already corrected earlier in the year, and the corporate acquisitions which were announced during the month.

Pharmaceutical stocks declined despite their defensive characteristics, possibly because of their strong earlier performance and subsequent profit-taking. Medical technology and healthcare services performed weakly, without any

Continued on the next page →

evident company-specific explanation, other than the fact that sentiment toward these sub-sectors was clearly negative. Short positions' development was less negative than the fund.

The most significant sector events in March were two acquisitions and Boston Scientific's release of the clinical results from the CHAMPION AF study. The fund was directly affected by these events through holdings in relevant companies.

Eli Lilly's acquisition of Centessa, a biotechnology company developing treatments for excessive daytime sleepiness (narcolepsy), and Biogen's acquisition of Apellis, which operates within ophthalmology and kidney diseases, together contributed approximately one percentage point to fund performance. By contrast, results from Boston Scientific's much-anticipated CHAMPION AF study disappointed the market, and the share price declined further. The strongest contributors during the month were Apellis and Insmed, while Boston Scientific and Eli Lilly were the largest negative contributors.

Apellis rose following the news of the acquisition

Apellis' main product, Syfovre, is used to treat geographic atrophy, a disease affecting the macula. Over time, the company's sales growth has moderated due to a small but not insignificant risk of serious side effects. Sales nonetheless have continued to grow, and the company has also developed a new, promising kidney drug, Empaveli, based on the same active substance as Syfovre. This drug is intended for rare kidney diseases caused by an overactive complement system.

On the final day of the month, Biogen announced its intention to acquire Apellis. Biogen is in the process of building a kidney disease franchise, thereby achieving critical mass in this therapeutic area. The ophthalmology business also continues to offer significant growth potential, particularly as Biogen is a global company with established sales channels across all major markets. Apellis rose as a result of the announcement.

Recovery during the final days of the month for Insmed

Although Insmed's share price developed weakly during most of March, it rose sharply during the final two trading days. Insmed develops a range of drugs and was a Wall Street favourite during 2025. Its drug, Brinsupri, which targets bronchiectasis, a condition involving permanent dilation of the airways that can lead to chronic cough, lung infections, shortness of breath, chest pain and fatigue, continued to appear likely to become a very significant product, even if the market has not fully reflected this potential in recent months.

The disease is underdiagnosed and is often confused with COPD and asthma. Clinical practice is now evolving rapidly as a targeted therapy becomes available. Even more important for the late-month share price rebound was the publication of strong data by a competing company in pulmonary fibrosis, a disease area in which Insmed has a similar but potentially even stronger drug candidate currently in clinical development.

Stroke signal weighed on Boston Scientific

Boston Scientific presented CHAMPION-AF, a study testing whether the Watchman FLX cardiac implant could replace anticoagulant therapy (DOACs) for stroke prevention in patients with atrial fibrillation. The implant closes the left atrial appendage, the source of most blood clots in atrial fibrillation.

The study showed that Watchman FLX was non-inferior to modern bloodthinners for the composite endpoint of stroke, systemic embolism and cardiovascular death. However, the risk of ischemic stroke appeared approximately one percentage point higher after three years of follow-up, though this difference was not statistically significant. Ischemic stroke can cause partial paralysis, loss of speech or impaired vision, with significant consequences for patients and their families. Notably, the implant demonstrated significantly fewer spontaneous relevant bleeding events. The market concluded that the results were unlikely to materially accelerate growth in procedure volumes, and the share price declined.

The race between Lilly's and Novo's GLP-1 drugs continued

Eli Lilly's share price declined in March following indications that competitor Novo Nordisk had achieved a strong start to the launch of its oral GLP-1 drug under the Wegovy brand, which shares its name with the injectable formulation. Many investors appeared to have been unprepared for competition from Novo Nordisk to be so intense. A 'sell' recommendation from the investment bank HSBC was justified by the view that future price competition within obesity treatments was being underestimated.

Reflections

Comments from President Trump suggesting that the US could end the conflict with Iran within two to three weeks, together with indications from Iran's president that Iran could consider ending the war if provided with guarantees that it would not reignite, were interpreted by the market as signs that both parties were moving closer to the negotiating table.

We share this interpretation, although the situation remains difficult to assess. It is hard to see that any country involved in the conflict, or indeed any country globally, genuinely desires a prolonged war, with the possible exception of Russia and certain other oil-producing countries that are independent of the Strait of Hormuz and who would benefit from higher oil prices.

The probability of an end to the conflict is perhaps best reflected in the development of oil prices, which at month-end may have reached a temporary peak, assuming that the political signals at the end of March contained more substance than general diplomatic goodwill and positioning.

High-quality companies in focus

In an equity market characterized by renewed optimism, stocks that have been most adversely affected by the conflict are likely to recover most rapidly in the short term. Companies that have faced negative, company-specific developments unrelated to the conflict, or product development issues are likely to find recovery more challenging.

Within our sector, the market continues to focus on quality in a broad sense, including companies with pricing power, sales momentum, and strong resilience in an environment that remains uncertain, as well as companies with solid development capabilities over both the short and long term. We continue to prioritize these characteristics in our selection process.

During the month, we reduced exposure to companies with weaker prospects for near-term recovery, whether due to short-term operational uncertainties or because potential positive news lies further into the future. This is easier said than done, as share prices often reflect these factors in advance. However, during recovery phases following market corrections, momentum tends to outweigh valuation.

Almost all major macroeconomic events over the past century have ultimately provided attractive opportunities to invest in high-quality companies at discounted valuations. We continue to view short- and medium-term risks with this in mind. A high degree of diversification, high quality across portfolio holdings, stable growth prospects, and companies with products that address significant medical needs remain core principles in our ongoing selection process.

This approach applies equally to our large, mid-sized, and smaller holdings. We have already seen four acquisitions of portfolio companies so far this year, and we continue to expect further consolidation within the sector. Among our smaller holdings, we currently see around thirty attractive companies with the potential to be acquired over time. When oil- and gas markets open up, fundamentals of our holdings in growth stocks should be even more appreciated.

Euribor 90D (high-water mark)

Legal disclaimer

Rhenman Healthcare Equity L/S ("the Fund") is not an investment fund as defined in the European Union directives relating to undertakings for collective investment in transferable securities (UCITS). Legal information regarding Fund is contained in the Prospectus and the KIID, available at Rhenman & Partners Asset Management AB (Rhenman & Partners) webpage: <http://rhepa.com/the-fund/prospectus/>.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Fund. Investors are strongly recommended to get professional advice as to whether investment in the Fund is appropriate having considered particular investment needs, objectives and financial circumstances before investing.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Fund will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in the Fund with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore,

information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the <http://rhepa.com/> website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the <http://rhepa.com/website> in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Fund may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of the Fund described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in the Fund does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Fund, repayment of capital from the Fund, any particular return from or any increase in the value of the Fund.

The representative in Switzerland is FundRock Switzerland SA, Route de Cité-Ouest 2, 1196 Gland, Switzerland. The paying agent in Switzerland is Banque Cantonale de Genève (BCGE), 17 quai de l'Île, 1204 Geneva, Switzerland. The Prospectus, the Articles of Association and [annual and semi-annual report, if any] [annual financial statements] can be obtained free of charge from the representative in Switzerland. With regards to the Shares offered in Switzerland, the place of performance is the registered office of the representative and the place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.
