

Monthly report

RHENMAN HEALTHCARE EQUITY L/S

This is marketing communications. For professional investors only. Past performance is no guarantee of future returns.

Henrik Rhenman
Chief Investment Officer

Summary

- ◆ The AI boom lifted global equity markets to new highs in May, despite continued geopolitical unrest.
- ◆ The fund posted a positive month, gaining between 4.5 to 5.5 percent depending on currency and share class. The acquisition of the biotechnology company Esperion was welcomed by the fund.
- ◆ We see medium-term opportunities across all four healthcare subsectors, despite risks of volatility driven mainly by factors such as inflation, interest rates, monetary policies, the conflict in the Middle East and the mid-term elections.

Monthly comment

Global equity markets once again reached new highs in May. The rise was primarily driven by the AI boom and strong earnings. The market's perception that the economy had, up to that point, absorbed the increase in oil prices without major consequences for growth or inflation, also affected the rise. Earnings forecasts are improving, especially in the US, where profits are expected to increase by more than 20 percent in 2026.

Continued geopolitical unrest

The month was marked again by continued geopolitical unrest in the Middle East as a result of the closure of the Strait of Hormuz and the many questions surrounding Iran's relationship with the rest of the world. Nevertheless, investors regained risk appetite through a prolonged ceasefire between the US and Iran, which has opened the way for some oil flows through the Strait of Hormuz. Oil prices fell sharply from their elevated levels, reflecting reduced concern about an imminent, acute energy crisis.

A new Fed chair at the helm

The new chairman of the US Federal Reserve, Kevin Warsh, delivered his first public speech in May. His primary emphasis was on reforming various aspects of the central bank. This may point to restraint on the question of rate cuts in the future. Changes in monetary policies, is not something a Fed chair can decide alone. At some point in the future, Warsh may seek to implement a broader shift in monetary policy by materially reducing the Fed's bond holdings. This would be a challenging move and would likely require offsetting measures to prevent long-term yields from rising too sharply. In other words, the banking system would need stronger incentives to absorb a larger share of government debt. Increased rate volatility should therefore be viewed as a considerable risk.

The US two-year Treasury yield increased somewhat during the month, while the ten-year yield stabilized after first rising sharply and then retreating by almost as much. According to the market, the probability of further near-term rate cuts is now rather low. On the contrary, rate hikes cannot be ruled out after the midterm elections. The equity market has, to date, handled these

potentially changed expectations notably well. The focus lies elsewhere, primarily on earnings growth in individual companies and hopes of stronger economic activity.

AI-related sectors at the top

The month was characterized by a continued strong focus on the technology sector, and in particular hardware suppliers within the AI segment. The world index rose 5.5 percent in euro terms, while the S&P 500 gained 5.6 percent. A US semiconductor index rose by almost 22 percent. Within healthcare, pharmaceutical and biotechnology companies stood out in particular.

Fund performance

The fund increased in value during May by 5.4 percent in the main share class IC1 (EUR). All four subsectors contributed positively to the fund's performance. The subsector indices also rose with the exception of medical technology, which ended the month down. The short book contributed positively during the month, and the fund benefited from yet another takeover in May when biotechnology company Esperion was acquired.

During the month, share prices reflected the continued strong fundamentals of the majority of the fund's holdings, with idiosyncratic company-specific events carrying significantly more weight than the impact of macro sentiment. The month's strongest contributors were Eli Lilly and Guardant, while Alignment and Insmed were the largest negative contributors.

Eli Lilly – a new member of the “trillion-dollar club”

Eli Lilly was one of many holdings that performed strongly during the month. The company became the first in the healthcare sector with a market capitalization of more than one trillion dollars, a level that 15 companies have now reached. A strong report on the last day of April was well received, when the company forecast higher sales than the market had expected. The FDA announced that so-called compounding of GLP-1 products no longer will be permitted and that the specific 503B discounts (discounts for those who lack insurance and are not covered by Medicaid)

Continued on the next page →

would no longer be granted for those weight-loss drugs. Lilly has now launched its GLP-1 tablet Foundayo which it is confident will be successful despite Novo having been the first to market and very successful with its oral product. A series of news items strengthened sentiment during the month for Lilly, for example, new data for the ulcerative colitis drug candidate, mirikizumab. Lilly's next obesity drug candidate (retatrutide) is attracting a lot of interest from both private individuals and investors. Retatrutide, is extremely potent, with 28 percent weight loss in a clinical study. The FDA is already having to devote resources to curbing the illegal handling of this not-yet-approved drug.

New approval gave Guardant's share price a lift

Guardant, the diagnostics company focused on liquid biopsy in cancer, received approval early in the month for Guardant360 CDx as a companion diagnostic for a certain type of mutated breast cancer, the company's third in this indication area. A simple blood test can identify those patients who have the mutation and who can therefore be treated with the appropriate medicine, without the need for a tissue biopsy. The most significant news, however, came toward the end of the month, when the company received approval for Guardant360 Liquid CDx, a broader analysis diagnostic with a genomic footprint around 100 times larger that also integrates so called epigenomic profiling. Between these two events, the company reported strong earnings and raised its guidance, which contributed to a sharply positive share price reaction.

Concerns over cost control weighed on Alignment

Alignment, a smaller but rapidly growing Medicare Advantage insurer, managed the feat of both delivering very strong results and, at the same time, significantly frightening investors after being charged unnecessarily high amounts for the treatment of patients who in reality only required observation. This created concern about the company's cost control, an area in which it is generally recognized as being highly capable while still delivering high quality care. The company maintained that the problem was short-lived during the quarter and therefore entirely temporary. However, the share price still fell sharply.

Somewhat slower sales for Insmed

Biotechnology company, Insmed, has a revolutionary treatment for bronchiectasis, a disease characterized by enlarged airways that prevent mucus from being cleared effectively, and which therefore leads to inflammation, infection and further deterioration in the airways. The company's share price corrected sharply during the first half of the year, not least in May, as it became clear that sales development would not be as strong as many investors had hoped. Many patients had been waiting for the medicine to be approved, and after a rapid uptake among these patients, the drug has seen a somewhat slower sales trajectory compared to the introduction last year. Revenue for the drug, Brinsupri, is now expected to increase by 'only' one billion dollars during 2026, which is of course still an extremely steep sales increase but lower than the highest prior expectations. However, as sales are constrained by the identification of the right patients (for example, those who do not only have COPD or asthma), and with sales outside the US only marginal so far, the launch should still be regarded as being at an early stage.

Reflections

After a slow start to the year, the healthcare sector's fundamentals can still be summarized as strong. Adjusted for managed care, select M&A-related write-downs (Merck) and unprofitable companies, earnings in the sector increased by just under 14 percent, which was in line with the development in global equity markets. Whether or not such adjustments ought to be made, we consider them to be relevant, not least because the earnings decline among insurers was heavily discounted and this subsector now appears to be recovering. We therefore believe that 14 percent in adjusted earnings growth is a meaningful reflection of the fundamentals currently enjoyed by companies in the healthcare sector.

The market for the healthcare sector has improved somewhat since the beginning of the year, but several conflicting forces are set against one another. On the one hand, there are signs of overheating in the technology sector, continued geopolitical unrest with oil prices in focus, and a global economy characterized by rising inflationary pressure. This, we think, could result in stagflation tendencies with rising rates and tighter monetary policy. On the other hand, many sectors are fundamentally performing surprisingly well or at least maintaining forward momentum despite high oil prices. Moreover, many company valuations have not risen materially, while earnings growth has increased in line with equity prices. Underlying demand among consumers is building and consolidating, while waiting for the broader economic outlook to become clearer. Thus, global growth could, we think, strengthen relatively quickly if the conflict in the Middle East were to be resolved. In summary, positive factors are largely offset by negatives, and equity markets' performance are driven primarily by current and expected earnings growth.

Continued strong demand for healthcare

Healthcare stocks should, on average, be able to withstand a potential correction relatively well, especially large, profitable companies with good sales expectations in coming years. A sharp market decline, for instance due to stagflation tendencies, larger military conflicts, or an oil price shock are, particularly for smaller companies, however, difficult to hedge against, and none of these scenarios can be ruled out with any degree of certainty. Yet, demand for healthcare continues to rise in most economies, and medical progress remains very strong. The most likely outcome is therefore a continued recovery for the fund's holdings. Indeed, the overall uncertainty cannot be ignored, we continue to focus on innovation-driven companies whose underlying strengths are largely insensitive to cyclical fluctuations. We see clearly-defined medium-term opportunities for strong equity price development across all four subsectors, despite risks of volatility driven mainly by external factors.

Euribor 90D (high-water mark)

Legal disclaimer

This is marketing communication. The AIF-funds ("the Funds") managed by Rhenman & Partners Asset Management AB ("Rhenman & Partners" or "Rhepa") are not investment funds as defined in the European Union directives relating to undertakings for collective investment in transferable securities ("UCITS").

Legal information regarding the Funds is contained in the Prospectuses and the KIDs/KIIDs, available at Rhenman & Partners webpage: www.rhepa.com. The prospectus and the KID/KIIDs can be obtained free of charge. The prospectus and KIIDs are available in English, the KIDs and the compliant handling information are available in English and Swedish.

Full details of the risks associated with an investment in the Funds are available in the Prospectuses and KIDs/KIIDs, which contain complete risk information and can be accessed at the Rhenman & Partners webpage: www.rhepa.com.

This material has been prepared by Rhenman & Partners for professional and non-professional investors. Rhenman & Partners when preparing this information has not taken into account any one customer's particular investment objectives, financial resources or other relevant circumstances and the opinions and recommendations herein are not intended to represent recommendations of particular investments to particular customers. This material is for informational purposes only and should not be construed as an offer or solicitation to sell or buy units in the Funds. Investors are strongly recommended to get professional advice as to whether investment in either of the Funds is appropriate having regard to their particular investment needs, objectives and financial circumstances before investing.

Past performance does not predict future returns. Future performance is subject to taxation, which depends on investors' situation and may change in the future. Any scenario presented, as applicable, is an estimate of future performance based on evidence from the past on how the value of this investment varies, and/or current market conditions and is not an exact indicator; what investors will get will vary depending on how the market performs and how long they keep the investment. For a complete overview of the costs connected to an investment in the Fund, please refer to the relevant costs and expenses sections of the offering memorandum. Please refer to the prospectus and to the KID/KIID before making any final investment decisions. The costs connected to investments in the Fund may increase or decrease as a result of currency and exchange rate fluctuations. Investors should be aware that any use of leverage, as applicable, may result in increased returns but also in potential increased losses. The decision to invest in the Fund should take into account all of its characteristics and objectives as described in the prospectus and other fund documentation. For additional information on the sustainability related aspects, please refer to the relevant ESG/SFDR disclosures in the offering memorandum and on www.rhepa.com. Investors can connect with Rhenman & Partners at www.rhepa.com to obtain a summary, in English, of their rights. ONE Fund Management S.A., as alternative investment fund manager of the Fund, can terminate the arrangements made for the marketing of the Fund.

All securities' transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk. There can be no assurance that an investment in the Funds will achieve profits or avoid incurring substantial losses. There is a high degree of risk inherent in investments and they may not be suitable for all eligible investors. It is possible that an investor may lose some or all of its investment. The past is not necessarily a guide to the future performance of an investment. The value of investments may fall as well as rise and investors may not get back the amount invested. Changes in rates of foreign exchange may cause the value of investments to go up or down.

Before making an investment decision, an investor and/or its adviser should (i) consider the suitability of investments in either of the Funds with respect to its investment objectives and personal situation and (ii) consider factors such as its personal net worth, income, age, risk tolerance and liquidity needs. The Funds are illiquid,

and redemptions are limited to specified windows. Investors should be prepared to hold for the long term. Short-term investors and investors who cannot bear the loss of some or all of their investment or the risks associated with the limited liquidity of an investment should not invest.

Due care and attention has been used in the preparation of this information. However, actual results may vary from their forecasts, and any variation may be materially positive or negative. Forecasts, by their very nature, are subject to uncertainty and contingencies, many of which are outside the control of Rhenman & Partners. Rhenman & Partners cannot guarantee that the information contained herein is without fault or entirely accurate. There may be delays, omissions or inaccuracies in the information. Any dated information is published as of its date only and no obligation or responsibility is undertaken to update or amend any such information.

The information in this material is based on sources that Rhenman & Partners believes to be reliable. Rhenman & Partners can however not guarantee that all information is correct. Furthermore, information and opinions may change without notice. Rhenman & Partners is under no obligation to make amendments or changes to this publication if errors are found or opinions or information change. Rhenman & Partners accepts no responsibility for the accuracy of its sources.

Rhenman & Partners is the owner of all works of authorship including, but not limited to, all design text, images and trademarks in this material unless otherwise explicitly stated. The use of Rhenman & Partners' material, works or trademarks is forbidden without written consent except where otherwise expressly stated. Furthermore, it is prohibited to publish material made or gathered by Rhenman & Partners without written consent.

By accessing and using the <http://rhepa.com/> website and any pages thereof, you acknowledge that you have reviewed the following important legal information and understand and agree to the terms and conditions set therein. If you do not agree to the terms and conditions in this disclaimer, do not access or use the <http://rhepa.com/> website in any way.

Products and services described herein are not available to all persons in all geographical locations. Rhenman & Partners will not provide any such products or services to any person if the provision of such services could be in violation of law or regulation in such person's home country jurisdiction or any other related jurisdiction. The units of the Funds may not be offered or sold to or within the United States or in any other country where such offer or sale would conflict with applicable laws or regulations.

In no event, including (but not limited to) negligence, will Rhenman & Partners be liable to you or anyone else for any consequential, incidental, special or indirect damages (including but not limited to lost profits, trading losses and damages).

The sole legally binding basis for the purchase of shares of either of the Funds described in this information is the latest valid sales prospectus with its terms of contract. Subscriptions cannot be received on the basis of financial reports.

An investment in either of the Funds does not represent deposits or other liabilities of any member of the Rhenman & Partners Group. Neither Rhenman & Partners nor any member of the Rhenman & Partners Group and its affiliates guarantees in any way the performance of the Funds, repayment of capital from the Funds, any particular return from or any increase in the value of the Funds.

The representative in Switzerland is FundRock Switzerland SA, Route de Cité-Ouest 2, 1196 Gland, Switzerland. The paying agent in Switzerland is Banque Cantonale de Genève (BCGE), 17 quai de l'Île, 1204 Geneva, Switzerland. The Prospectus, the Articles of Association and (annual and semi-annual report, if any) (annual financial statements) can be obtained free of charge from the representative in Switzerland. With regards to the Shares offered in Switzerland, the place of performance is the registered office of the representative and the place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.
